EXPERIENCE

Software Development Intern

July 2025 - August 2025

Softflew Technologies

Lucknow

- Engineered frontend features for a production MERN application over a 45-day internship, enhancing 10+ pages.
- Resolved 12 critical UI bugs and implemented UI enhancements across assigned modules.
- Integrated REST APIs into React components to fetch, render, and update application data.
- Collaborated using Git workflows including branching, pull requests, and code reviews.

PROJECTS

JobLeLo | *React, Redux, Node.js, Express, MongoDB, Docker, GitHub Actions, Gemini AI*

Live | GitHub

- Aggregated 600+ IT job listings from 100+ company career pages, including Greenhouse, Lever, and Workday, via a full-stack platform.
- Implemented JWT cookie authentication with email OTP and Google Sign-In, supporting 50+ users with saved jobs, watchlists, and automated alerts.
- Designed and automated scraping pipelines using API and Puppeteer, orchestrated by GitHub Actions and cron jobs, monitoring 150+ sources via an admin dashboard.
- Added JobMate AI career assistant (Gemini) and resume/job match scoring for personalized recommendations.

Pixora | *React, TypeScript, Bun, Express, Prisma, PostgreSQL, Clerk, Cloudinary*

Live | GitHub

- Engineered a full-stack secure cloud photo gallery with browser-side AES-256-GCM encryption, Argon2id key derivation, and envelope encryption for up to 100 photos per user (free tier).
- Secured user data with a zero-knowledge design using AES-256-GCM for data/keys and Argon2id for KEK derivation, protecting 0.2 GB theoretical max storage per user.
- Mastered secure user authentication and deployment pipeline by integrating Clerk and webhooks, achieving 10+ successful production deployments.
- Designed passphrase-based key wrapping (KEK + master key) with an optional recovery code so photos stay unreadable without the user's secret.

Private Chat | *Next.js, TypeScript, Elysia, Redis, SSE, Prisma, PostgreSQL*

Live | GitHub

- Developed a real-time chat application supporting 20+ concurrent users, featuring ephemeral and persistent rooms with history using SSE, Redis, and PostgreSQL.
- Secured ephemeral chat rooms with HTTP-only cookie access tokens and atomic Redis rate limiting, capping users to a fixed message rate per second and blocking unauthenticated access at the API layer.
- Built type-safe APIs using Elysia and Eden Treaty, anonymous identities, room codes, pagination, and soft deletion for rooms.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML5, Responsive Design

Backend: Node.js, Express.js, Bun, Elysia, REST APIs, JWT Authentication, OTP Authentication

Databases: PostgreSQL, MongoDB, Redis, Prisma ORM

Developer Tools: Git, GitHub, GitHub Actions, Docker, Docker Compose, Vercel, Render, VS Code, IntelliJ IDEA

Concepts: Data Structures & Algorithms, Full Stack Development, Web Scraping, Realtime Systems (SSE), System Design, CI/CD, Agile

EDUCATION

Goel Institute of Technology and Management

Lucknow, UP

B.Tech in Computer Science and Engineering — CGPA: 7.3/10

Nov. 2022 - June 2026

ACHIEVEMENTS

- Solved 375+ DSA and competitive programming problems across [LeetCode](#) and [Codeforces](#).
- Built a production-grade job aggregation system indexing opportunities from 100+ company career pages.
- Implemented end-to-end encrypted cloud photo storage where uploaded images remain unreadable to the server.
